

## **Cbonds Add-in Removing**

### ***How to remove Cbonds Add-in correctly***

To remove the Add-in, you need to do the following:

1. Close any open Microsoft Office Excel files and exit the program
2. Open "Start" menu, click on "Control Panel" and find the menu item responsible for Add/Remove programs
3. Find Cbonds Add-in at the list of installed programs
4. Click the Uninstall button.

### ***The instructions in case of incorrect removal***

If the Add-in has been removed incorrectly, you will not be able to install it again. To solve this problem you need to:

1. Make sure that the add-in has been removed
2. Open the Registry Editor (regedit.exe)
3. Follow the path \ HKEY\_CURRENT\_USER \ Software \ Microsoft \
4. Find the "VSTO" section
5. Within the "VSTO" section there are 2 sub-sections "Security" and "SolutionMetadata"
6. Go to "Security" section, and then in "Inclusion", there will be sections with the name "45e59586- ebfa-4f61-9b1d-d83ef1b5fca0"
7. Delete each section, which "Url" key contains the line "CbondsAddIn.vsto" inside.
8. Go to "SolutionMetadata" section, there are sections with the name "{334C0E1F- B137-4DA5- 8E73- B559C96D910E}"
9. Delete each such section, which "addInName" key contains the line "CbondsAddIn" inside

After completing each instruction item, install the add-in.

If the problem has not been resolved, do the following:

1. Go to the directory C: \ Users \ UserName \ AppData \ Local \ Apps \ 2.0
2. Delete all folders that contain information related to Cbonds Add-In
3. Clean the registry once more
4. Install the add-in
